About Us:

Assured Environments is a commercial pest management organization that has been in business since 1934. As a pioneer in the pest management industry, Assured Environments has been providing its clients with cutting-edge technology based solutions for over 92 years. Throughout their history, Assured has focused on being a trusted resource to our loyal client base by providing their 230 employees and technician's specialized training protocols and procedures. Assured Environments uses the most advanced Integrated Pest Management approach geared towards environmentally friendly applications to achieve green and sustainable options that protect our clients' brand, their places of business and the health and safety of their employees.

Areas We Service:

- New Jersey
- New York City
- Pennsylvania
- Queens
- Brooklyn
- Bronx
- Long Island
- Westchester County
- Rockland County
- Putnam County
- Orange County
- Dutchess County
- Massachusetts
- Connecticut

Offices In:

New York, NY
Cranford, NJ
Hawthorne, NY
Valley Stream, NY

Services We Provide:

- Integrated Pest Management (IPM) Services – IPM is a pest management concept based upon identifying and removing existing or potential pest resources (food, water, shelter) through regular inspection, observation and action.

- Bed Bug Treatment & K9 Detection – Our offerings of detection, elimination, control, prevention, maintenance programs, and extended service warranties. Depending on the situation we can provide conventional treatment (HEPA-vacuuming, steam treatment, dusting of voids, and crack & crevice treatment) or thermal treatment (heating the space to eliminate bed bugs in all stages of life). Additionally, we offer K9 bed bug detection to provide effective and fast detection compared to visual inspections alone.
- Bird Control & Remediation – We have a variety of bird control and remediation methods including bird netting, humane shock systems, bird wire and live capture & release. To ensure that you have the best system, we survey and inspect your property to develop a customized plan for your facility.

ASSURED environments

Local Pest Solutions Since 1934

- Compactor / Trash Chute Cleaning – Our comprehensive trash chute cleaning and maintenance program thoroughly degreases, disinfects, and deodorizes the chute walls and doors.
- Drain & Fly Management Services – We have developed a protocol with unique products and services designed to successfully manage fly infestation in commercial facilities that are fully compliant with all food safety programs.
- Entomologist Evaluations – Our on-staff entomologists are available for facility evaluations.
- Quality Assurance Inspections - Our quality control program is designed to ensure that our protocols for service are being closely followed. Quarterly, the supervisor assigned to oversee the account will accompany the technician throughout his day to make recommendations, follow up on any current pest issues and give guidance in regard to the program we have in place
- LEED & Green IPM Based Programs – Our Green IPM system that delivers results without unnecessary or indiscriminate use of pesticides. It can be tailored to meet either Green Shield or LEED certifications.
- Professional Consulting
