P1 PEST SOLUTIONS

One dashboard for every building

P1 Shield is **one dashboard for everything happening in the buildings we service**: every visit and report, resident requests, the conditions our technicians flag, and compliance. Managers see their buildings. Leadership and boards see **the whole portfolio**.

Every visit, documented

EVERY BUILDING

1. **A heads-up first**
   Building staff get a text with our arrival time before every visit.
2. **Requests in a few taps**
   The manager or front desk sends a unit request from Shield, and our office books it onto the schedule.
3. **Every unit documented**
   Photos, notes, products and the resident's signature, logged unit by unit.
4. **It's in Shield**
   In progress while we're there, completed when we're done, with the service report on file.

What's on the dashboard

Visits and reports

Upcoming visits, what was done on each one, and every service report by building and unit.

Requests

Service, supplies or a question, sent from the portal and tracked until it's done.

Building conditions

What our technicians flag, like entry points, leaks or sanitation, with photos, until it's fixed.

Compliance on file

HPD violation status, pesticide records, product labels and SDS, and the December bed bug filing.

Board-ready summaries

A service summary PDF for one building or the whole portfolio, for any period, in one click.

Full unit history

Every visit to an apartment in one PDF, with resident signatures, for any complaint.

One standard across the portfolio

Same standard everywhere

Every building gets the same visit record, report and paperwork, whichever manager or technician.

The right view for everyone

Each manager sees only their buildings, on a personal link. No passwords, works on a phone.

Vendor paperwork on hand

Our insurance certificate, W-9 and DEC registration, ready to download.

See it on your own buildings

Your personal preview link is in the email this page came with. No login needed, and it works on your phone.
